Plan to regain private enterprise

Private committee
Como - 2004

The proposed project to regenerate the site through the change both physically and functionally working together with the residential spaces and the public green areas as well as car parks, and small areas of neighbourhood.

The setting of new residential buildings, requires that the building should be constructed with five storey's, with pleasing areas, integrated with the new residential complex and also to the public services that already function in the area. In this sense, the project means to verify the present state and any planned changes that are undergone in the neighboring areas, aiming to provide physical connections between the routes and areas just as can be found within the complex.
